The 7th International Conference Health Polytechnic of Surabaya (ICOHPS) was held on September 18 – 19, 2024 in Surabaya Indonesia. This international conference was attended by lecturers, students, and researchers from various regions in Indonesia and abroad. Poltekkes Kemenkes Surabaya (Surabaya Ministry of Health Polytechnic) hopes to contribute knowledge and recent developments regarding the six pillars of healthcare transformation and their roles in addressing catastrophic diseases. We hope the conference will promote scalable solutions applicable to various healthcare systems, ensuring that advancements in health technology benefit populations worldwide, including those in underserved areas.

## *Six Pillars of Healthcare Transformation to Combat Catastrophic Disease*

Health care transformation is an initiative by the Ministry of Health to carry out health transformation activities that include 6 types of transformation, such as the transformation of Primary Services, Referral Services, Health Resilience Systems, Health Financing Systems, Health Human Resources, and Health Technology.<sup>(1)</sup> The ICOHPS 2024 international conference focused on Provide Insights by sharing knowledge and recent developments regarding the six pillars of healthcare transformation and their roles in addressing catastrophic diseases, fostering collaboration between international experts, researchers, and policymakers to develop cohesive strategies for tackling devastating diseases, Highlight Innovations practices and technologies that have proven effective in transforming healthcare systems and managing severe health crises, and Promote education among healthcare professionals and stakeholders about the latest advancements and methodologies in healthcare transformation. The pillars of health transformation include the transformation of primary services, the transformation of referral services,

## *Key International Conference Themes and Discussions*

The theme of this international seminar is Orchestrating the Six Pillars of Healthcare Transformation to Combat Catastrophic Disease. It includes Policy Innovation and Reform, Healthcare Delivery Systems, Technological Advancements, Workforce Development, Patient-Centered Care, Community Engagement and Public Health. The conference explored these critical topics to create a comprehensive understanding of how the six pillars of healthcare transformation can be orchestrated to combat catastrophic diseases effectively. Attendees will gain valuable insights, share innovative practices, and collaborate on strategies to enhance global health resilience.

### ***Significant Findings and Contributions***

The selected paper in the special issue of Health Dynamics discussed various research results related to Health, including maternal, child, and adolescent health. Some of the findings in this article include: 1) how child development can be monitored with family commitment, 2) exploring family functioning in adolescent dating violence, 3) Risk Factors of preeclampsia incidents, 4) A Back Massage Acupressure for Treating Dysmenorrhea and how to prevent stunting.

### ***Looking Ahead: The Future of Combatting Catastrophic Disease***

The future of combating catastrophic disease is international collaborations and initiatives crucial in combating diseases affecting large populations. Improving sanitation, vaccination, and access to healthcare are essential in preventing and controlling outbreaks. This special issue serves not only as a testament to the success of ICOHPS 2024 but also to participate in improving Public Health through Early Intervention and Rapid Response.
